This brand new file features Podiatrists. These medical professionals provide the vast majority of foot health care services in the U.S. They deal with the prevention, diagnosis, treatment and rehabilitation of medical and surgical conditions of the feet and lower limbs. To treat these problems, podiatrists prescribe drugs, order physical therapy, set fractures and perform surgery. They may also fit corrective inserts, design plaster casts and strapping's to correct deformities, and design custom-made shoes.

Most podiatrists are self-employed with a median income over \$96,000. These podiatrists are also responsible for running a small business, including providing for their employees' health insurance and retirement benefits. These professionals are excellent prospects for CME, medical supplies, business services, investments, credit cards, vacation offers and much more.

Records with License Number are available!
