DESCRIPTION

The Datamasters Dental Hygienists mailing list allows you to reach these dental healthcare professionals at their home address.

A dental hygienist or oral hygienist is a licensed dental professional who specializes in preventive oral health. They are licensed to assess the patient, make diagnosis, create a treatment plan, implement the plan, and evaluate the prescribed treatment. A dental hygienist will perform general teeth cleanings for children as well as adults. They are also experienced in prophylaxis, scaling, and root planning for patients with periodontal disease. During cleanings, an oral hygienist will check for gum disease or receding gums, remove plaque or tartar buildup, floss, administer fluoride, and provide instructions for oral hygiene. Dental hygienists would use such dental instruments as periodontal probes, dental mirrors, cheek retractors, dental drills, dental burs, dental excavators, burnishes, toothpaste, in the course of their work.

Purchasers of this mailing list would include ongoing education and training companies, dental equipment manufacturers, health care uniform providers, footwear providers, credit card issuers, dental hygiene providers, toothpaste and toothbrush suppliers, and sealant manufacturers.
