### DESCRIPTION

The Datamasters Neonatal Nurses mailing list allows you to reach these health care professionals through their personal email address.

Neonatal nurses are registered nurses (RN), Advanced Registered nurses (ARN) and licensed practical nurses (LPN) who care for newborn infants during the first month of their life. They are responsible for the general care of babies including regular diaper changes, feedings, nurturing, health monitoring, education of parents, and administration of medications. If the baby is born premature, neonatal nurses may also insert and remove IVs, draw blood for testing, and perform diagnostics. They would use thermometers, diapers, formula, cribs, rocking chairs, blood pressure cuffs, bathing supplies, baby powder, ointment, needles, syringes, bandages, gauze, stethoscopes, medical supplies, medical instruments, uniforms, masks, and gloves in the course of their duties.

Purchasers of this mailing list would include hospital supply retailers and wholesalers, pharmaceuticals, imaging companies, medical apparel providers, pediatric supply providers, office supply providers, diaper suppliers, ointment suppliers, computer hardware and software suppliers, medical periodicals, baby furniture providers, continuing education providers, and healthcare insurance providers.
