This newly updated file features doctors who specialize in the diagnosis and treatment of animal diseases and injuries. Veterinarians play a major role in the healthcare of pets, livestock, and zoo, sporting and laboratory animals. Most veterinarians perform clinical work in private practices. A small number of private-practice veterinarians work exclusively with large animals. These professionals can contribute to human as well as animal health. A number of veterinarians work with physicians and scientists as they research ways to prevent and treat various human health problems.

They are excellent prospects for work-related offers.

**Records with License Number are now available!**
