

# Respiratory Therapists

## SEGMENTS

44,917      Datamasters Respiratory Therapists

## DESCRIPTION

The Datamasters Respiratory Therapists mailing list allows you to reach these healthcare professionals through direct mail marketing efforts at their home address.

This mailing list allows you to market to respiratory therapists trained to help patients improve their ability to breathe comfortably. They use medications, inhalers, and ventilation equipment to ease symptoms. They will also educate and instruct patients on how to use medications or equipment in their own homes. A respiratory therapist may be a certified respiratory therapist (CRT) and with further education can become a registered respiratory therapist (RRT). Respiratory therapists work under the direction of a physician. They analyze oxygen levels in blood work, examine x-rays and perform a variety of test to understand the degree of impairment. They treat chronic respiratory disorders such as asthma, bronchitis, sleep apnea, and emphysema. They use ventilation systems, inhalers, diagnostic equipment, medications, tubing masks, nebulizers, filters, purifiers, CPAP machines, and oxygen. Purchasers of this mailing list would include hospital supply retailers and wholesalers, pharmaceuticals, imaging companies, respiratory supply providers, home purifier manufacturers, allergen control manufacturers, organic bedding suppliers, medical apparel providers, continuing education providers, laser

equipment suppliers, office supply providers, computer hardware and software suppliers, medical periodicals, medical furniture providers, and healthcare insurance providers.
